

pensionsync

Ed Patchett
Head of Operations
– HR and Payroll
Software

“We believe that working with pensionsync gives our clients a strategic advantage in the market place”

Bond International Software’s Payrite payroll software is used by major accounting firms and leading payroll bureaus throughout the UK.

Head of Operations, Ed Patchett, had overall responsibility for integrating Bond’s Payrite payroll software into the pensionsync platform. So, why is pension data automation important?

“Data automation is important because of the sheer volume of data. The number of new pension schemes being set-up by our clients is massive. This is causing an awful lot of additional workload.”

But the problem facing all payroll software companies is that every pension provider has different protocols and treats data differently. Bond’s view was its development effort was better focused working with an expert in the field of data integration, rather than dealing directly with the various pension company’s API.

That’s where pensionsync comes in. We build data interfaces to the major pension providers so that your payroll software does not have to.

“Working with pensionsync has filled in the missing part of the auto-enrolment jigsaw puzzle. We’re very confident that Payrite does a great job of assessment, processing & producing comms. What we were lacking was direct APIs into various pension organisations. That’s what pensionsync has given us.”

Bond is rolling out the pensionsync Whitelabel Plan.

“pensionsync’s Whitelabel plan means Bond can leverage the pensionsync technology but still provide our clients with a one-stop shop, fronted by Bond.”

pensionsync is designed to be easy to work with at every stage. Our online knowledge base & free Software Development Kit significantly reduces integration timescales. But the real time & cost saving is that 1 integration with pensionsync gives access to 5 major pension providers.

“Working with pensionsync has been a positive experience. The underlying technology is well designed and pensionsync have been very supportive to our team as we built our solution”
