

# pensionsync

**OPTENROL**   
ASSESS + CALCULATE > COMMUNICATE

*"pensionsync has helped us create a true one-stop-shop service, that significantly reduces AE processing time for our clients"*  
Richard Bolton, MD

## With a highly regarded client list of accountancy practices & advisers, OptEnrol is a leading automatic enrolment middleware brand.

On top of OptEnrol's ease of use, low charges & communications capability, OptEnrol is unique in adding real AE value to many of its customers because of its compatibility with Sage.

*"By incorporating pensionsync into OptEnrol we have created a true one-stop-shop for our clients. they can set-up new schemes, process payrolls, communicate with Employees, and then automatically upload the agreed contribution data each period at the press of a button."*

pensionsync has created two benefits for Richard: the first for his customers and the second for his own business.

*"Many of our clients run several payrolls for their own clients. These accountants and payroll bureaus don't have the time to manually process hundreds of pension data files each pay period. pensionsync technology dramatically reduces the manual processing burden for our customers".*

*"Without pensionsync we'd have to build a separate integration directly with each pension provider in their widely varying formats. With pensionsync they take care of all the onward transmission of the data to all of the pension providers."*

pensionsync is purpose built for automatic enrolment software providers. We have encapsulated the complexity of pensions and presented it in an easy-to-use platform which can be easily embedded into any payroll or AE middleware software.
