pensionsync announces several new clients as
the platform goes from strength to strength

pensionsync, a financial technology platform that connects payroll to pensions, is today announcing several payroll providers are now signed up to the service.

Leading companies Star and Intuit, as well as smaller payroll providers Accentra, PayCircle and K3 Business Solutions have all plugged into the pensionsync platform. They join Bond Payrite, Xero, and Qtac who began using the platform a year ago, along with middleware companies OptEnrol and AEclipse.

pensionsync is the first API platform that automates the exchange of data between payroll software and pension providers. It was devised by a team of financial data experts who recognised that automatic enrolment would create additional administrative pressures for SMEs and decided to provide a practical, efficient solution.

By working with pensionsync's data automation platform, payroll companies are able to communicate with a wide selection of pension providers, providing increased choice for their employer customers.

Will Lovegrove, CEO, pensionsync, says:

"pensionsync makes the process of transferring data faster and more efficient for payroll companies, meaning that the cost of administration, particularly for SMEs, is much reduced. This makes it easier for SMEs to provide choice for their employees.

"pensionsync's customers have a clear market advantage over other payroll software providers who are adopting a "head in the sand" approach to pension data automation to the detriment of their clients and their employees.

"Star Computers, Intuit Quickbooks, PayCircle and Accentra have chosen to partner with pensionsync to provide their customers with real time and cost savings, along with a real choice of pension providers.

"We are regularly seeing accountants, bureaux and SMEs change their payroll software on the grounds of AE functionality and efficiency and we look forward to

continuing to support our existing payroll software partners to increase their market share as the number of staging employers intensifies over the coming months."

Nigel Francis, Head of Operations, Star Computers Limited, says:

"The need for direct integration with the ever increasing number of scheme providers is compelling and we are excited about increasing the choice available through our integration with pensionsync and the undoubted benefits this will bring our clients."

Ralph Matlack, Director of Global Payroll, Intuit, says:

"By using pensionsync integrated with Intuit QuickBooks, small businesses can be confident they're ready for auto-enrolment. They can automatically calculate and submit their filings with the top pension providers, saving time and reducing the headache caused by manual upload and entry errors."

"Employers also have greater freedom to choose the pension scheme that's right for their employees."

pensionsync works closely with a range of pension providers such as L&G, Aviva, Standard Life, The People's Pension, Nest, NOW: Pensions and Smart Pension.

Catherine Pinkney, Co-founder, Paycircle

"pensionsync is the perfect partner for Paycircle as, like us, their platform is designed to connect seamlessly via Web Service APIs. This allows for easy integration and collaboration between our two platforms.

As soon as we met with the guys from pensionsync it was immediately apparent that they had developed an elegant and robust solution to the problem of integrating with a variety of pension providers. We had no concerns whatsoever regarding the quality of their solution. The whole integration project went really smoothly and their team couldn't have been more helpful.

Working with pensionsync has enabled us to focus on our own product and what we are good at, allowing us to leave the integration with multiple pension providers to the integration experts."

Joachim Victor, Director, Accentra, says:

"We found the perfect partner in pensionsync who have partnered with multiple pension providers using a single interface. With our unique approach to bureau clients and pensionsync's powerful API libraries, we have created a solution that is so seamless and automatic that users would be forgiven for forgetting their auto enrolment responsibilities."

Richard Bolton, Managing Director, Forth Communication (OptEnrol), says:

"Coping with the anticipated workload on Auto-Enrolment includes streamlining our interaction with payroll software and pension portals. pensionsync has offered that in an open honest way in which we have nothing to lose and much to gain. We support the initiatives they are taking and look forward to mutual success."

Peter Avery, Managing Director, AEclipse, says:

"We are excited to be working alongside pensionsync because they reflect our innovation and ethos around the secure data transfer of pension and personal details. The fit with pensionsync was easy as our own Auto Enrolment software does all the necessary work prior to filing schedules with the Provider, including work force assessment, validating the payroll data, creating TPR Notices, Enrolment and Contribution schedules – ready for instant trouble-free submission."

About pensionsync:

pensionsync is a solution to automate the delivery of data between payroll, AE middleware and pension providers. pensionsync is a product of Systemsync Solutions Ltd. We were formed in 2015 by the founders of a highly experienced and fast moving software development consultancy based in Parsons Green, London. Our engineering team has been building mobile apps, enterprise apps, software products and APIs for our customers for over 10 years.

Our management team has been at the forefront of some great technical innovations for the last decade. We have worked extensively in the music industry at the cutting edge of digital software technology helping to transform our client's businesses to allow them to compete in the era of digital distribution. We have been applying our knowledge of technology to positively impact the Pensions and Payroll industry since Autumn 2013.
