pensionsync lands more pensions giants as
the technology platform forges ahead

pensionsync, the technology platform that connects payroll to pensions, has today announced pensions giants Aviva and NOW: Pensions are the latest providers to be connected to the pensionsync data integration platform.

The partnerships mark a major step for the technology software provider, which launched in 2015. They follow on the tail of similar deals with leading payroll companies Star and Intuit, who recently signed up with pensionsync.

pensionsync is the first API platform that automates the exchange of data between payroll software and pension providers. It allows both parties to seamlessly exchange data, meaning that employers can interact with multiple pension providers via a single interface.

The platform makes AE processing simpler and more efficient, reducing the cost of processing, and cutting the time it takes for payroll to process monthly pension contributions to just 10 minutes for a large business and five minutes for SMEs.

Will Lovegrove, CEO, pensionsync, says:

“To have such household names such as Aviva and NOW: Pensions using the pensionsync platform is testament to how far we’ve come in such a short space of time.

“pensionsync alleviates the automatic enrolment administrative burden for pension providers and anyone who runs a payroll. Our technology democratises the market, promoting choice and meaning that every pensions provider who works with us is on a level playing field. This helps keep automatic enrolment about pensions, and not about the administration of pensions.

“With more and more providers on board, pensionsync is making auto enrolment quicker, easier and cheaper for employers, payroll and pension providers.”

Andrew Beswick, Managing Director Business Solutions, Aviva, says:

“After a lot of hard work and commitment between Aviva and systemsync it’s great to be able to announce we have a solution in place which is truly straight through with payroll providers who have implemented the pensionsync product. Over the coming years we expect payroll integration to just be expected by the payroll community, similar to how real time information data is transferred to HMRC now.

Aviva is a big supporter of the Auto Enrolment market and this was an opportunity to help strengthen our support in what can be a very time consuming part of the process. We look forwards to growing our partnership with systemsync, to deliver further enhancements.”

Peter Thompson, Director of IT at NOW: Pensions said:

“As demand to supply and manage pension data grows, it is essential that technological solutions are found to keep overheads low and data quality high. systemsync’s pensionsync framework connects beautifully with our new NOW: Pensions Gateway platform, launching in November, making pension submissions a breeze.”
